USMTF - Who We Are

The Defense Information Systems Agency (DISA) is responsible for maintaining Department of Defense (DOD) information technology standards and conventions. Within DISA, the Interoperability Standards Division is the designated configuration manager for the United States Message Text Formatting (USMTF) Program. The USMTF Program documentation consists of two major documents, **MIL-STD-6040**, *United States Message Text Formatting Program*, and **CJCSM 6120.05**, *Manual for Tactical Command and Control Planning Guidance for Joint Operations, Joint Interface Operational Procedures for Message Text Formats, presents implementation of United States Message Text Formats (USMTFs).*

The USMTF website is committed to supporting the warfighter and development of net-centric systems which utilized character-based messaging. This Private USMTF site serves the following purposes:

- Dissemination of Message Text Formats (MTFs) to the warfighter
- Provide tools and training information necessary to assist the warfighter succeed in generating, validating and sending Message Text Formats (MTFs)
- Provide XML-based representations (XML-MTF) of USMTF formats as well as related XML products and tools to assist in the development of net-centric systems
- Dissemination of information to representatives charged with the configuration management (CM) of the USMTF standard (MIL-STD-6040)
